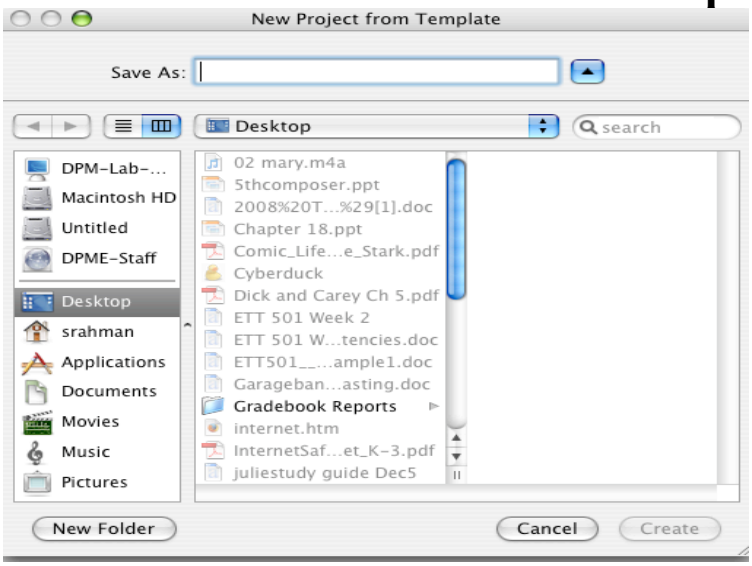
Garageband

Find and start Garageband

Open new Podcast Episode

Name file and save it to the desktop.

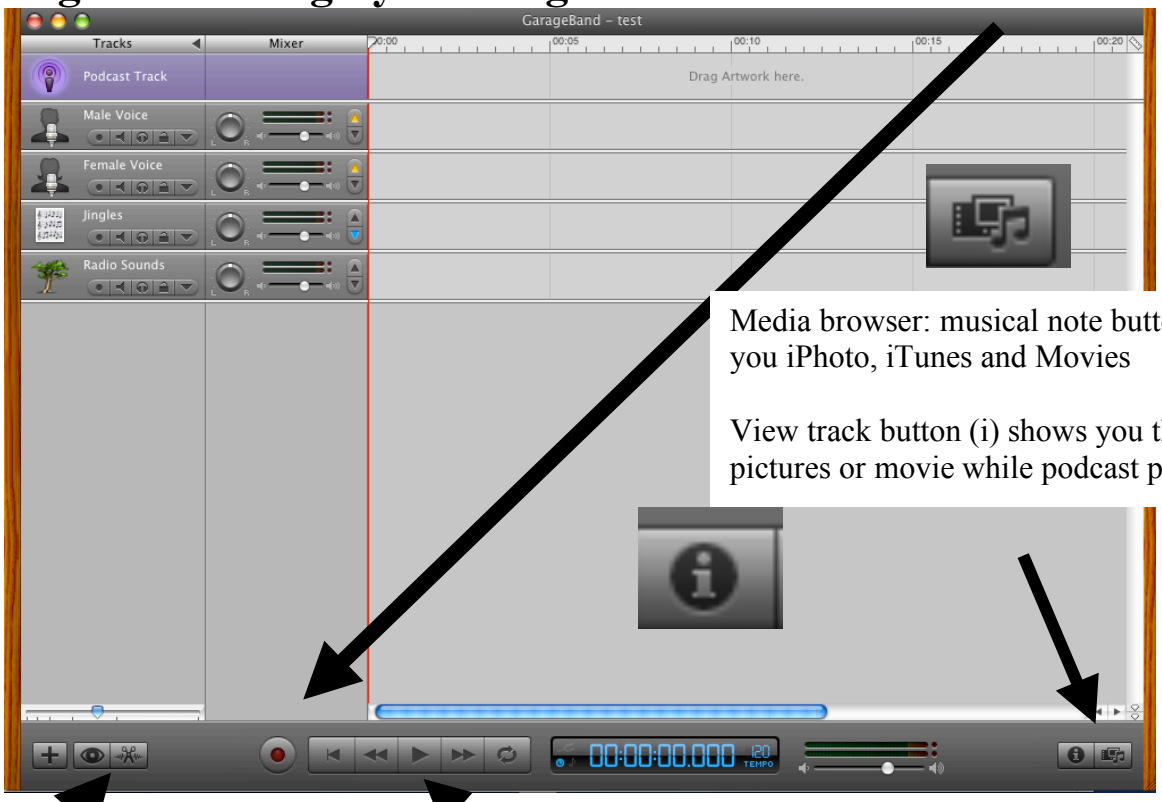


RECORDING VOICE

Plug in headphones and microphone into usb port on computer

If Garageband recognizes the headset, click yes to use the device…if it doesn't, go to the blue apple menu, click on system preferences, click on sound, go to input and output and make sure usb connection is selected.

Click on male or female track so it is active
Begin recording by clicking on the red record button



Media browser: musical note button-shows you iPhoto, iTunes and Movies

View track button (i) shows you the pictures or movie while podcast plays.
